

BALANCE

designed by Thomas Feichtner

Dynamic balance.
Balance arises from an essential design: tubular curved aluminium defines a minimal and slender structure that can be positioned horizontally or vertically, to direct light on the table in the office or in the home office.

Equilibrio dinamico.

Balance è frutto di un disegno essenziale: l'alluminio tubolare curvato tratteggia una struttura minimal e sottile, orientabile in orizzontale e in verticale per direzionare la luce sul tavolo in ufficio o nell'home office.
