Entretien			 Rétrécissement à 40°C : 1% max. à 60°C : 2% max	 Rétrécissement à 60°C : 1,5% max.		Dépoussiérer : chiffon microfibres Taches courantes : chiffon microfibres + eau savonneuse tiède Taches tenaces : Isopropanol ou alcool à brûler, + chiffon humide	 Rétrécissement à 60°C : 1.5% max. à 74°C : 2% max.	 Rétrécissement à 60°C : 1.5% max.		Dépoussiérer : chiffon doux et sec Taches : eau savonneuse, tamponner doucement

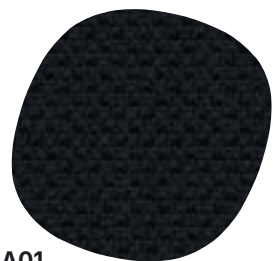

* La résistance à la lumière d'un tissu est un critère de qualité qui confirme sa capacité de résistance aux UV (aussi bien ceux de la lumière du jour que de la lumière artificielle). Elle permet de garder la densité des couleurs et d'éviter que le tissu ne s'éclaircisse avec le temps.

** La résistance à l'abrasion permet de mesurer la qualité du tissu sur sa solidité de frottement (mouvement assis debout répétitif). Le nombre de tours réalisés est comptabilisé jusqu'à la déchirure du tissu.

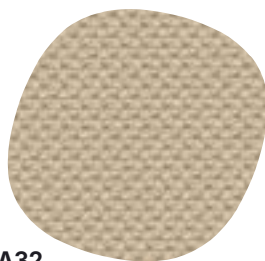

- Lavage à la main et en machine
- Lavage à la main et en machine (cycle modéré)
- Nettoyage à sec avec précautions
- Ne pas blanchir
- Séchage à 60 °C au maximum

- Séchage sur fil sans essorage
- Pas de séchage machine
- Repassage à 110° max
- Pas de repassage
